

ISO 14001: 2015 LEAD AUDITOR

This five day Certified ISO 14001 Lead Auditor training course is designed to develop the delegate's knowledge of Environmental Management System (EMS) auditing and ISO 14001:2015, delivering a full understanding of the processes and techniques of EMS auditing and the requirements of ISO 14001. EMS Auditing provides a proactive mechanism not only for identifying evidence of conformance with an organisation's own requirements for environmental management but also for identifying opportunities for enhancing performance.

This ISO 14001 Lead Auditor training course delivers its learning through theory, case studies and workshop sessions, including some group evening work.

The course is suitable for anyone wanting to develop their skills for auditing to a professional level that would be involved in auditing Environmental Management Systems either in-depth internally or as 2nd or 3rd party auditors.

Through the combination of interactive training delivery including workshops and case studies, delegates will be able to:

- Apply the requirements and principles of ISO 14001 to the specific processes and needs of your company as well as those of your suppliers
- Assess compliance of an organisation to meet your company's own internal or external requirements
- Conduct audits to professional criteria with confidence, gathering objective evidence through observation, interviewing, document trails to provide factual audit reports that will facilitate improvements to the EMS
- Achieve the formal training requirements to allow progression to becoming a Registered Lead Auditor
