

## ISO 9001: 2015 FOUNDATION

Enroll on this highly interactive and practical introduction to quality management and discover why ISO 9001 is the most popular quality standard in the world.

The course is designed to provide you with knowledge of the main principles of quality management and the key features of a process-based management system where Quality is fully integrated into the business.

Learn how risk-based thinking plays such an important part in the Plan Do Check Act cycle.

If you are booking one of our QMS Auditor courses, we would highly recommend that you attend this introductory course.

### DURING THE DAY YOU WILL...

- Fully appreciate the business benefits of a QMS
- Understand how to use the PDCA model for managing risk and facilitating continual improvement
